

DIGITAL LEGACY

A guide, not a legal grant of access

CONTAINS ACCOUNT IDENTIFIERS. STORE SAFELY.

This document lists platforms and usernames. No passwords are stored. Store this printout in a secure place; shredding is appropriate if it becomes outdated.

Note that this inventory is a GUIDE for family or executors. It has no legal force over the platforms themselves. Each platform (Facebook, Google, Apple, etc.) has its own official tool for designating posthumous access. Those are the only binding designations.

Where passwords live

I do not use one. The passwords are written in the address book in the desk drawer, which I know I am not supposed to do.

Overall guidance

I am not on much. Claire knows more about this than I do and I would rather she decided the ones I have not listed.

Keys and physical access

Small key for the firebox is taped under the silverware tray. The firebox is on the closet shelf in my bedroom.
